6	Maybe a couple little movie type finance clips, that might be hard to find though, most clips are probably just dry informational, but I love clips that entertain and help understand, like the big short, and the Enron documentary, but something of finance, just for fun but that's what I like, the instructor was great.
7	I don't know. His lectures are super straight forward and he explains what to expect for exams. So, his class is taught just about perfect. I literally don't know how he could be more clear and fair.
8	He was great, there isnt much to change
9	He can provide exam solutions after the exams are graded so we access them via blackboard.

1	practice assignments were helpful but maybe give us more than one per test with more variety to give us extra practice for the test
2	keep on showing enthusiasm about this class and stay the way you are!:D
3	bonus on each exam
4	The instructor should continue to provide thorough information about working through problems.
5	Thank you, I enjoyed taking this summer course. The only aspect that was confusing was the set up for the first exam seemed to be more emphasized from questions from the book and not the lecture slides you created. However, I think you corrected this by the second mid term.
6	Professor Beason presented the curriculum in an organized manner which made it extremely easy to follow; we knew we had a quiz, question set, and exam for each portion of the class. It was a summer course which met 3 nights a week, so each lecture was crucial to see, and you got pretty behind if you missed one. Professor Beason did an excellent job of communicating with his students and making himself available for your concerns.
7	Keep teaching the class like you are, gave a new light to finance
8	Keep doing what you're doing. Class was better than the online version.
9	Keep applying it to real life investing scenarios. Really interesting
10	Instructor Beason has been great! He really takes the time for everyone to understand the course material. He is very fair when it comes to grading, which is awesome. The exams are straight-forward and reflect what was covered during lectures. Tyler Beason is going to make an outstanding Professor within the near future!
11	He really delivered the class as a whole as it should be delivered, he didn't make it unnecessarily stressfull, but taught thoroughly.
12	Having students practice problems in class and then showing us how to do it after we have tried
13	Continue teaching the way you are. The class was excellent and Professor Beason did an awesome job.
14	Being straight forward and awesome.
